(54) METHOD AND DEVICE FOR GENERATING PERSONAL ADAPTATION TYPE MEDIUM
AND RECORD MEDIUM RECORDING PERSONAL ADAPTATION TYPE MEDIUM GENERATION
PROGRAM

(57)Abstract:

PROBLEM TO BE SOLVED: To provide personal adaptation type medium generating method and device capable of increasing a desire of learning and improving a learning effect by displaying a learner's name on a teaching material displayed on a display screen and a recording medium recording a personal adaptation type medium generating program.

SOLUTION: A learner's name or temporary name is inputted from a name input part 1 and the name is set up in a teaching material medium 5 by a name setting part 3 and presented to the learner by a teaching material medium presenting part 7. At the time of presentation, the medium 5 is presented to the learner by using the name for narration or displaying the name by color characters, and in the case of color display, specific display including flashing, size change and projection/recession is executed, the name is displayed by characters and moved on a display screen or colors are changed before and after movement to increase a learner's desire of learning.
